

CAMIS has many clients who choose to use our subcontract manufacturing service for either part or complete electronic and electromechanical assembly.

CAMIS has expertise across a wide range of manufacturing disciplines, supported by a highly experienced purchasing team and a global network of approved suppliers.

In-house assembly includes wiring looms, enclosures & populated pcbs All products are rigorously tested to exacting standards prior to delivery to the client.

Manufactured products include:

- **Electronic diagnostic and monitoring equipment**
- **Bespoke joystick control solutions for the agricultural industry**
- **Industrial boiler control and manufacturing**
- **DC motor controls**
- **Safety access & control system pcb assemblies**
- **Pump reversing modules**

CAMIS also offers a complete range of electronic sub contract manufacturing services specialising in the design and build of electronic controls developed for specific products and manufacturers.

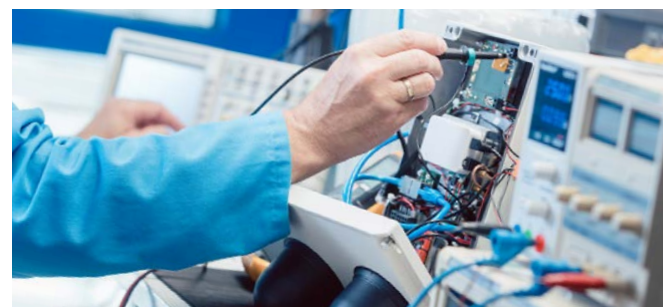

Sub-contract Services include:

- **Electronic system design and prototype build**
- **Full manufacturing and assembly services**
- **PCB design and manufacture**
 - Through hole
 - Surface mount assembly
- **Loom assemblies**

ELECTRONICS DESIGN & DEVELOPMENT

CAMIS designs, prototypes and manufactures a large range of bespoke electronic & electromechanical products for customers from a variety of different industries. We work closely with our clients to design & develop products to meet the most exacting performance standards, providing complete electronic & assembly solutions.

Our four-stage process
from initial concept through to manufacture

For over 40 years **CAMIS** has been a specialist distributor supplying components from leading manufacturers such as:

Products include a range of micro-switches, foot switches, relays, timers, counters, sensors, contactors, monitoring and control devices, PLC's and solid state relays.

COMPONENTS PLUS

From components supply to product assembly, **CAMIS** provides design assistance, technical support and a range of in-house-manufacturing facilities. This enables the integration of products within cable harnesses/wiring looms & control panels to provide a bespoke solution whether in small batch quantities or volume production. Facilities include

- Fully automated cable cutting, strip and crimp
- Control box assembly
- Overmoulding
- Epoxy potting
- Hot stamp cable marking

CAMIS customers who have benefitted from this complete 'component supply to product assembly' service come from a wide range of industries including:

- HVAC
- Environmental
- Aerospace
- Audio Visual
- Automotive
- Boilers
- Catering
- Gaming
- Heating
- Lifts
- Lighting
- Medical
- Mobility
- Railway
- Refrigeration
- Security
- Semi-Conductor
- Solar Panels
- Switchgear
- Vending
- White Goods
- Hoists

MOTORS & DRIVES

INDUSTRIAL ELECTRIC MOTORS & DRIVES SOLUTIONS

CAMIS Motors & Drives is a leading distributor of industrial electric motors and ancillary controls in both IEC format and special purpose designs.

STANDARD MOTORS

IE1 • IE2 • IE3 • IE4

SPECIAL MOTORS

IP67 • IP68 • IECEx
ZONE1 • AC-DC

CAMIS provides a comprehensive range of industrial electric motors and associated products including fans, gearboxes, alternators and switchgear. These products are complemented by a bespoke manufacturing service which enables the manufacture of products to exact specifications for a wide range of markets.

YOUR ONE STOP SOLUTION

ALTERNATORS

PUMPS

DRIVES & CONTROLS

STANDARD DOL

- Weatherproof IP55
- Single or 3 phase
- Start/Stop/Reset

SOFT START

- Reduces water hammer
- Protects pumps
- Diagnostic capability

VARIABLE SPEED

- R0.25 - 22kW
- Simple start/stop push buttons
- IP54 with ventilation
